PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years of professional experience across full time and contract based development, building web applications, dashboards, and React Native mobile apps. Skilled in React, Next.js, Node.js, TypeScript, Python, and FastAPI, with a record of improving performance and a workflow that has evolved from traditional coding to AI assisted development using OpenAI, Claude Code, and ChatGPT.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript, Python, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS

Mobile: React Native

Backend & APIs: Node.js, FastAPI, RESTful APIs, WebSockets

Databases: PostgreSQL, MongoDB, Redis

Authentication: Social Login, OAuth, JWT

Cloud & Deployment: AWS S3, Vercel, Netlify, Render

AI & Tools: OpenAI API, Claude Code, ChatGPT

Testing & Practices: Manual Testing, Jest, Unit Testing, Git, GitHub, Agile/Scrum, Code Review

PROFESSIONAL EXPERIENCE

Software Engineer | Grayphite (Lahore, Pakistan)

Jan 2026 – Apr 2026

- Optimized and debugged Unsurfaced AI, a real time Reddit trend discovery platform built with Python, FastAPI, Next.js, PostgreSQL, and Redis.
- Cut API latency by 40% and page load time by 35% through performance optimization.
- Moved data ingestion to an async pipeline; tested and debugged FastAPI and Next.js features.

Associate Software Engineer | PieCyfer (Lahore, Pakistan)

Aug 2024 – Apr 2025

- Developed React.js and Next.js admin dashboards for TruckUp and PureLab.
- Contributed to Amaizing, an AI driven competitive intelligence platform.
- Shipped in Agile sprints across USA–Pakistan time zones; used ChatGPT to cut QA effort by 35%.

Associate Software Engineer | DevBlends (Lahore, Pakistan)

Dec 2022 – Mar 2024

- Built React.js web apps and dashboards (Node.js, Redux Toolkit, Tailwind CSS), including WriteOut.
- Developed Colivease React Native features: dashboards, video meetings, and real time messaging.
- Reduced merge conflicts by 40% by applying structured Git branching practices.

PROJECTS

Unsurfaced AI – Trend Discovery Platform | unsurfaced-ai.com

- Real time Reddit trend discovery with trending topic, industry insight, and sentiment analysis modules.
- Optimized APIs, moved data ingestion to an async pipeline, and debugged features using Python, FastAPI, Next.js, PostgreSQL, and Redis.

Amaizing – AI Competitive Intelligence for Ecommerce | amaizing.io

- AI competitive intelligence platform for Amazon brands: market maps, rival tracking, weekly insights.
- Contributed to feature development of the product.

BlockTrust – AI Managed Crypto IRA Platform | blocktrust.com

- Contributed to production readiness and performance optimization of an AI managed crypto IRA platform.
- Improved application performance and addressed issues required for production deployment.

XANA – Decentralized Metaverse Platform | xana.net

- Contributed as a React.js Developer to a Web3 metaverse platform, working on user feeds, posts, comments, chat, hashtags, mentions, and regex based functionality.
- Resolved complex bugs and unexpected user flows.

WriteOut – Collaborative Writing & Word Games | writeout.co

- Real time word game and collaborative writing platform with Word Duel, daily puzzles, leaderboards, and OpenAI powered content generation.
- Built React features using Node.js, Redux Toolkit, and Tailwind CSS.

TruckUp – Mobile Truck Repair & Roadside Assistance | truckup.com

- Marketplace connecting truck drivers with mobile mechanics.
- Built admin side web dashboards with React.js and Next.js.

Colivease – Coliving & Roommate Matching | colivease.ca

- Roommate matching platform for coliving.
- Developed React Native mobile features including dashboards, video meetings, and real time messaging.

PureLab – Healthcare Diagnostics Platform | purelab.com

- Diagnostics laboratory network platform.
- Built admin side web features with React.js and Next.js.

EDUCATION

Bachelor's Degree in Computer Science

Feb 2021

University of Lahore, Lahore, Pakistan
